

FOOD STORAGE TIP:

Reviving Leafy Greens

Wilted greens can be revived by submerging them into a bowl of cold water and placing them in the refrigerator for 12 hours.

After 12 hours, remove the greens and gently shake off excess water, pat dry and place into a container. Keep refrigerated until use.

MOUNTAIN WISE

DOUBLE UP
FOOD BUCKS

Made possible with funding from the
Community Foundation of WNC and the
USDA Gus Schumacher Nutrition
Incentive Program.
